EXPERIENCE

Built distributed AWS services, allowing site to scale to doubling YOY growth.
Architected new promotion functionalities for increased average order value.
Planned and scoped quarterly project roadmaps with product leads.

Led project to decrease ad-block use, yielding \$1.5m increase in yearly revenue.
Implemented my team's first front-end test suite for our Ad SDK.
Provided technical mentorship to interns and junior engineers.
Collaborated with Systems Team to incorporate Jenkins CI and Docker.

Wrote a re-usable custom component library in Vue.js.
Bolstered and maintained data visualization projects written in Angular (1.x).
Improved speed of build processes for legacy projects by 20 percent.
Company acquired by Nike, Inc. after departure.

Provided technical mentorship for students learning full-stack JavaScript.
Worked as part of an agile engineering team for the school's learning platform.
Conducted technical interviews for potential students.

Site manager for the store's website (Drupal).
Procured hardware and software for a large research university.
Provided extensive onsite and remote technical support.

EDUCATION

Psychology major with a minor in Hispanic Languages.
Relevant coursework includes Intro to Programming (Java), Statistics, and Deductive Logic.

Attended the Grace Hopper Program at Fullstack Academy, a selective software engineering bootcamp for women.

TOOLS I USE

JavaScript, TypeScript, Node.js, React, Redux, Ruby, Rails, GraphQL, AWS, Git
Webpack, Electron, Angular, Vue, Vuex, Google Cloud Platform, Kubernetes
Golang
